

Gulf Select

Tank Boost Fuel System Concentrate Treatment #GS254

Product Description

Gulf Select Tank Boost Fuel System Concentrate Treatment improves fuel efficiency by cleaning the entire fuel system. As well, it increases fuel atomization. Smaller gas atoms burn better, which gives you more energy. This means more miles per tank for your customer.

Features and Benefits

- Improves Fuel Economy and Combustion
- Safely removes moisture in fuel system
- Contains no harmful alcohols
- Cleans Fuel Injectors
- Formulated for direct injection

Gulf Select Tank Boost Fuel System Concentrate Treatment chemically changes water in gasoline, creating a combustible hydrocarbon. By removing the water, ethanol related issues are eliminated along with the possibility of corrosion of fuel system components.

TANK BOOST FUEL SYSTEM CONCENTRATE TREATMENT
